

Preparations for casting

Three dry products supplied in 25 kg bags. Deflocculation, density and viscosity parameters must be established for the customer's formulation and process.

REF.	DESCRIPTION	PACK	USE
GE220	White stoneware powder	25 kg	Casting / formulation
GE210	Red stoneware powder	25 kg	Casting / formulation
AR01	Noron clay powder	25 kg	Casting / formulation

BEFORE USE

Define with Raoult & Fils or by testing: water content, deflocculant, density, viscosity, setting time, shrinkage, firing temperature and glaze compatibility.
